

**2017-2018**  
**SPRING TERM 1**

**BUSE 1100 Nonprofit Arts Management**

In this course students learn essential business practices in the public and private sector, the ins and outs of fundraising, grant writing, board governance, volunteer management, and regulatory impacts in the nonprofit art industry. Using text, images, videos, online discussions, interactive learning objects, case studies, and projects, students deepen their understanding of the role of the leadership positions and organizational hierarchy in nonprofit organizations to identify ways to effectively and creatively respond to problems and challenges.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

**BUSE 1200 Self-Management and Entrepreneurship**

This course provides artists of all disciplines with the fundamentals for self-sustaining careers in the arts, entertainment, and media. This class provides students with an understanding of the matrix of skills, promotional vehicles, and revenue streams in the arts industries as well as fundamentals of career development and business acumen.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

**COMM 1150 Introduction to Social Media and Digital Strategies**

This introductory course aims to teach students how to connect businesses, brands, and nonprofits to their critical audiences via digital communications. Through real-world best practices, examples, and hands-on projects, students will learn on-the-job skills and identify possible career paths in a vibrant field that blends aspects of advertising, public relations, and journalism.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

**CRWR 1100 Introduction to Creative Writing**

This course introduces students to an extensive creative writing practice by inviting them to write in a variety of genres and forms. Students should become familiar with core literary devices such as structure, conflict, scene, character, voice, point of view, setting, tone, metaphor, imagery, dialogue, and language. Students should learn to read closely and analyze stylistic choices and literary elements from genres such as poetry, fiction, nonfiction, playwriting, and hybrid texts. Course writing will range from experimental to traditional, from structured to open. Students will also be introduced to the critique-based workshop process by writing in various genres and by providing feedback to their peers.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

### **CRWR 1150 Ray Bradbury and Creative Storytelling**

This course aims to examine the craft of early and contemporary progenitors of the dark fantastic genre—Nathaniel Hawthorne, Edgar Allen Poe, Ambrose Bierce, Shirley Jackson, Charlotte Perkins Gilman and others, leading to an in-depth exploration of the Bradbury oeuvre, from his numerous short stories, to his classic novels including The Martian Chronicles and the seminal Fahrenheit 451. In addition to analyzing and reflecting on Bradbury's compositions, learners will actively use his strategies and techniques to create their own original creative works. Assignments will include weekly readings of classic Bradbury stories and tales by other notable writers in the tradition; critical online class discussions and/or short reading quizzes; a look at countless never-before-seen Bradbury ephemera from a private collection; Bradbury-inspired writing prompts that will develop and hone your skills; as well as two final creative projects that utilize your own passions and artistic expertise as well as influences from Ray Bradbury and his work.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

### **GAME 1100 Introduction to Game Development**

This course serves to introduce animation, development, programming, and sound students of the Game Major to the game development industry. In this course history and context of video games will be reviewed and introduce students to the processes and practices of the game development industry. The course aims to place emphasis on applied critical discussion as well as exploration and identification of characteristics of the diverse game genres. Students will have the opportunity to produce written documentation and develop their own game concept at the end of the course.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

### **HIST 1150 History of Chicago**

Through the exploration of major historical themes, this course focuses on Chicago's social, economic, and cultural development since the first contact between indigenous peoples and the French in the 17th century to the late 20th century election of the second Mayor Daley. Students will examine political organization, ethnic diversity, racial divides, economic expansion, and cultural expression, as well as the impact of de-industrialization and technological innovation to understand its place in the urban world.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

### **INMD 1100 Introduction to User Experience Design**

Thinking holistically about participant-centered interaction is the foundation of successful user experiences. In this eight-week course, you will be introduced to concepts in design thinking, empathy, and context that will allow you to create engaging experiences. A tool kit of processes, documentation, and products will be explored to allow you to effectively advocate for users and justify your work.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

### **PROG 1100 Creative Coding and Design with Arduino**

This introductory-level course teaches students to design functional products using the open-source Arduino platform. Through creative coding and electrical design, learners make simple devices that are both functional and expressive. Weekly hands-on projects build on one another as additional features such as sound, light, movement, and interactivity are added. Strategies for creating sensor-driven physical computing systems featuring analog sensors, LEDs, photoresistors, temperature sensors, momentary switches, servo and DC motors, and power isolation are covered. The course has no technical prerequisites. Algebra-level math abilities required.

**Requisites:** See course description

**Credits:** 3 (*Non-credit option available*)

### **PROG 1200 App Design with Swift Programming**

In this course students learn the fundamentals of programming using the Swift language and the Xcode IDE. Using different types of media, asynchronous and synchronous activities, and real-world scenarios, they experience the process of app development while exploring successful examples of user interface design. Working with the Swift programming language and Apple developer tools, students learn the process of troubleshooting, prototyping, and coding best practices, developing transferable skills for many areas of design. By the end of the course, students will learn the process of app development from concept to prototype to final product and be able to articulate both technical and aesthetic concepts to team members and clients.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)

### **SIGN 1100 American Sign Language 101**

This course concentrates on the development of conversational fluency in American Sign Language (ASL). The course is a basic introduction to ASL and students will develop expressive and receptive ASL skills through discussions of such topics as exchanging personal information, talking about surroundings, families, emergencies, attribution, and activities.

**Requisites:** None

**Credits:** 3 (*Non-credit option available*)
